

TRANSITION AGREEMENT

The College of New Caledonia has a two-year Diploma Program in Wood Processing and Engineering, providing education and hands-on skill building experiences that will enable graduates to contribute to efficient, cost-effective processing of BC wood products.

Graduates have an excellent future in the wood products manufacturing sector, with job opportunities in the growing private sector manufacturing industry. Graduates of the Wood Processing and Engineering Program work as technicians, technologists, managers and inspectors in secondary and tertiary wood manufacturing operations.

Wood processors and manufacturers in BC support this program and have participated in curriculum development. Primary wood manufacturers in BC have also indicated an interest in the development of this program and the eventual hiring of its graduates.

John Meagher
Acting Vice-President, Academic
The College of New Caledonia
3330 – 22nd Avenue
