

Kalesnikoff Lumber Company Ltd.

Since 1939

Kalesnikoff Lumber Company is a dynamic company with a proud history and a terrific future. We are located between Castlegar and Nelson in the West Kootenays of British Columbia. We produce over 200 specialty products and we employ about 100 employees. We pay our employees competitive wages and provide great benefits and a challenging future for those workers who are looking for the opportunity to advance.

We are always looking for experienced and motivated individuals who want to learn as much as they can. With so many young people looking for work these days, it is very difficult for inexperienced workers to even get in on entry level jobs. Fortunately, for WoodLINKS students, Kalesnikoff Lumber Company has made a commitment to take students with certificates and give them preferential training for positions requiring more skills and paying better wages.

We are very interested in receiving applications from individuals who have WoodLINKS certification and are seeking employment in the wood manufacturing industry.
