Pacific Rim Cabinets was formed 4 years ago to provide high value cabinets directly to the Japanese house and condominium markets. Our first year was a great success and we have grown to one of the largest suppliers to Japan from North America. Products include not only the latest designs of kitchens but also china cabinets, vanities and Japanese entrance cabinets. We produce in several species of wood as well as laminate and painted door styles.

As we continue to expand there is a great need for additional motivated and talented individuals to help with the companies growth. We can also offer advancement and additional company funded training for those who show potential and desire.

**Pacific Rim Cabinets Ltd is interested in receiving applications from individuals with a WoodLINKS Certificate and are seeking employment opportunities with a dynamic and growing company.**
