

Tyee Timber Products Ltd

Tyee Timber Products Ltd is a Langley based lumber remanufacturer. We process lumber purchased from sawmills into usable products specifically for our customer's end use. We produce orders of Hemlock, Western Red Cedar, Douglas Fir, Yellow Cedar and SPF from the interior of B.C. We produce many different products including tongue and groove paneling and flooring.

Much of the work we do to produce our products is labor intense. Usually a grader/trimmer grades and trims the lumber based on our customers end uses then several people pile and package the lumber or products for market.

WoodLINKS Certificate holders are encouraged to apply.
